# Adaptation!

## Cause and Effect

When it comes to ADAPTATION, an animal's environment is the reason -- or cause -- that the animal changes. The change, or adaptation, is the effect.

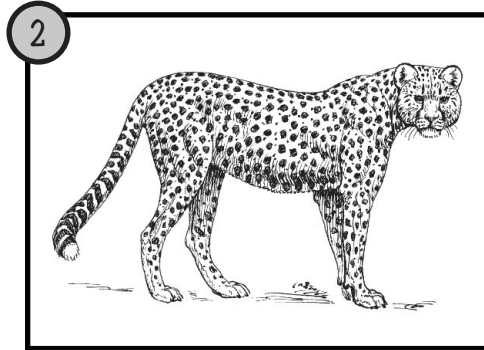

Look at the following images and read the description of each animal's habitat. How have these animals adapted? Think about it in terms of CAUSE and EFFECT.

**Cause:** A polar bear lives in cold, snowy places.

**Effect:** \_\_\_\_\_

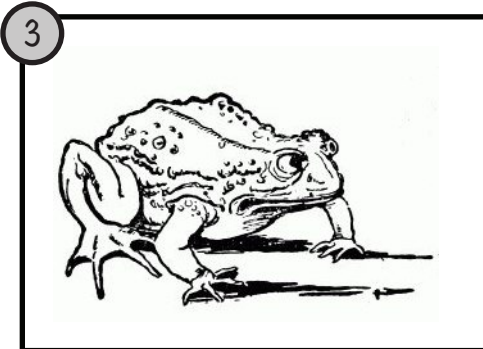

\_\_\_\_\_

**Cause:** A cheetah lives in hot, grassy places.

**Effect:** \_\_\_\_\_
